

AbSorber AB  
Press release  
27 March 2007

**Camilla Tell Järte new Medical/Marketing Manager. AbSorber AB has appointed Camilla Tell Järte as Medical/Marketing Manager. In this capacity, Camilla will mainly be engaged in the marketing of XM-ONE. She will also play an important role in the planning process for AbSorbers coming product portfolio.**

Before joining LinkMed, Camilla Tell Järte held a position as Product Manager at Merck Sharp & Dohme AB. Camilla has also held several marketing and medical positions at Orion Pharma AB and Aventis Behring AB. Camilla will play an important role in the development of AbSorbers marketing position mainly in the Nordic area but also in EU and US.

AbSorber is focused on development and marketing of products for transplantation.

XM-ONE™, AbSorbers first product on the market, enables rapid detection of any specific anti-endothelial cell antibodies as well as antibodies to HLA class I and II antigens that are also expressed on endothelial cells. The presence of recipient IgM and IgG antibodies to donor endothelium is detected by the XM-ONE™ cross match test kit using flow cytometry — the method that is used today in many tissue typing laboratories for the lymphocyte cross match testing — and takes only 2 1/2 hours.
